

Important Note About ScienceBased Health® Manufacturing Standards

Dear Customer:

The FDA sets standards for GMPs (Good Manufacturing Practices) that govern how dietary supplements are manufactured, to ensure supplements provide the identity, strength, composition, quality and purity represented on the label.

ScienceBased Health's (SBH) manufacturing facilities meet or exceed all GMP standards, and have been awarded NSF® certification – an optional third-party verification that ensures GMP compliance. For over 75 years, NSF International® has been the world leader in standards development, product certification, education, and risk-management for public health and safety.

In compliance with GMPs, SBH products do not display expiration dates on the bottles. Rather, they include the date of manufacture on the bottom of each bottle, in the following format “MANUFACTURED: mm/yyyy”.

- **As a general guideline, all SBH products currently have a 2 year estimated shelf life.**
- Products should always be stored in a cool dry place to maximize shelf life.

SBH products always ship fresh. Because our products ship directly and do not sit on retail shelves, you can count on receiving recently manufactured product.

To ensure optimal freshness and allow you to save on your order, SBH offers the option of purchasing a package discount plan and splitting larger orders (6 or more bottles) into multiple shipments, sent at regular intervals. This is also a convenient alternative to having to store many bottles.

Please contact Customer Care at: **888.433.4726** or email us at: **CustomerCare@ScienceBasedHealth.com** to sign up for a package discount plan or if you have any questions.

Sincerely,

Alain Magro, President
